

Environment and Sustainability statement

OSR Projects is committed to reducing our environmental impact. We aim to increase sustainability practices and policies in the organisation and to grow our community's awareness of environmental concerns.

What we've done so far:

- OSR Projects has used green power since 2010 provided by [Ecotricity](#)
- We use litho and digital printers within a 20 mile radius and use FSC/recycled stocks when printing exhibition or event material
- We recycle packaging where possible
- We recycle reuse materials when creating an exhibition space and repurpose wood and board etc
- We promote walking, cycling and public transport, car share when hosting events
- We encourage our visitors and artists to sign up to our newsletter rather than send out printed invitations
